DATIA Committee Sign-Up Form
PLEASE RETURN TO DATIA BY 12PM FRIDAY, JUNE 17, 2011.

I am interested in assisting DATIA in furthering its mission. Please sign me up for the following committee. I am committed to participating in the committee I have selected, and understand that I am expected to respond to email requests for input and participate in intermittent teleconferences.

Communications Committee - Members of the Communications Committee are responsible for assisting DATIA in the development of content for DATIA focus. The committee will work to ensure that DATIA remains a vital part of the industry through relevant article publication. To meet this goal, committee members will be responsible for identifying topics of interest and identifying, contacting, and securing authors. Each committee member is expected to prepare/secure an author for at least one article for the DATIA focus or other industry publication.

Conference Committee - The Annual Conference Committee is responsible for identifying industry leaders to speak at the annual conference, providing suggestions for conference session topics, assisting in the development of the conference theme, soliciting and securing sponsors, and providing suggestions for ensuring that conference attendees are pleased with the annual conference. Each member is expected to secure at least one sponsor or speaker for the DATIA Annual Conference.

Technology Committee - The Technology Committee is responsible for identifying and developing forward thinking ways to deliver content and resources to DATIA members. This includes applications for mobile delivery, web delivery options, and other delivery methods identified by the committee.

International Outreach Committee - Members of the International Outreach Committee are responsible for furthering DATIA's presence in the global drug and alcohol testing market for the benefit of DATIA members. The committee will work to identify partners in other countries and facilitate discussion and collaboration on how we can learn from each other's experiences, develop best practices for international testing, and address drug free workplaces on an international level.

Legislative and Regulatory Committee - Members of the Legislative and Regulatory Committee are responsible for providing guidance to DATIA on legislative and regulatory issues as they arise in the drug and alcohol testing industry, and assisting DATIA in determining those issues on which the association will take a position. Written comments and white papers on issues and potential regulations affecting the industry are formed through input from this committee.

Education Committee - The Education Committee is responsible for the development of industry standards/best practices and educational programs to benefit providers of drug and alcohol testing services. Roles include but are not limited to assisting in the development of industry standards, maintaining the integrity of DATIA's standards and training programs, and identifying topics and soliciting presenters for webinars.
